

Duralco 6105 SP 1200°F Stainless Paint is

Two Products for The Price of One

The Corrosion Resistance of Stainless Steel with

The High Temp Protection of Cotronics' Binders

- **Use to 1200°F**
- **Durable & Long Lasting**
- **Heat & Corrosion Resistant**
- **Easy to use**
- **Just Spray on & Air Dry**

Duralco 6105SP combines the corrosion resistance of 316L stainless steel with the high temperature protection of Cotronics' specialty binders to form a 1200°F protective coating.

Easy to use. Just shake, spray and dry.

Duralco 6105 SP cures at room temperature to form a continuous stainless protective coating

Offers excellent chemical, corrosion, solvent and high temperature resistance.

Duralco 6105 fights corrosion and heat to 1200°F and will extend the part life of any Industrial, Laboratory, Automotive and Home Equipment.

Use in Chemical, Marine, Laboratories, Automotive, Industries, Pharmaceutical, etc..

Ideal for coating high temperature equipment, pipes, stacks, boilers, furnaces, heat exchangers, furnaces, etc.

Available in convenient to use 7 oz. Spray Cans

Just on can covers up to 30 square feet of metal.

Directions for use:

Roughen surfaces if possible.

Remove any low temp primers or paints.

Spray on clean prepared surface.

Cure overnight at room temp.

Air dries in 15-30 minutes.

Full cure will occur normally with use. (When exposed to temperatures of 350°F.)

If used at Temperatures below 350°F, then post cure 1 hour at 350°F.

Duralco 6105SP is the ideal choice for up to 1200°F protection of metal surfaces.
